

## **Round table discussion: Approaches to Earth Observation applications and services**

**CEOS Plenary, Montreal – approx 2-3 hour meeting (depending on numbers of participants)**

### **Objective:**

To share national and Agency approaches to the exploitation of Earth Observation missions and data.

For example:

- Programmes aimed at science, policy or commercial user uptake
- Infrastructure or services to support user uptake
- Associated measures of success used by Agencies.

### **Agenda:**

1. Introductions
2. Round table presentations: each Agency or participant to present their activities. (Approx 10 minutes per Agency depending on numbers)
3. Discussion: Common themes, approaches, barriers and opportunities. Are we duplicating efforts? What scope is there for further collaboration?
4. Discussion: Does CEOS have a role in supporting collaboration? If so, what would that be?
